

I had completed 4.7+ years of experience in Software Development.

Below is the accomplishments in past one year.

As per my past review , I improved majorily in Linux cmds and started prioritize my work. Even my manager is very happy and told the same thing in 1 on 1 to me.

I got an FFT quarterly award in open forum in March month.

Last week Executive Director visited India office and she also recognized my work regarding ingesting Db2/parquet data to snowflake.

Completed KAFKA and SNOWFLAKE Udemy courses. Snowflake tutorial helpful a most in masking policy and loading data into the snowflake. In future getting work in KAFKA also. Currently I am learning AZURE and deploying JAVA apps and in future thinking to do AZURE OR REDDIS Cache Certificate.

Helped Cross-team to setup snowflake and helped to load data. i.e (SIMM/MINMGN) team.

Onboarded Jenkins Pipeline, Integrate SONAR for my team as well as other team member also. Write Documents for onboarding lightning tool.

Individually handling in loading data to snowflake with the help of lightning tool.

Helping team members in INDIA as well as in New York. Giving guidance to new joinee about MS technology. Even I am ready to train and give guidance and taking more responsibility also.

Actively taking part in ROTA/On support call.

Helped RA-team members and hygiene members to debug into intraday system(Riskadmin project)

In sport event I Win Football and got award too and in carrom win till semi-final round.
